# Work Experience \_

ience \_\_\_\_\_

Sep. 2021  $\sim$  current

**BEAT** - DATA SCIENTIST (PRICING)

Focusing on analysis and development of dynamic pricing strategies.

Oct. 2019 ~ Aug. 2021

## ML Programs (Open Gl Group) - Senior Data Scientist

- Working on machine learning applications for insurance markets, e.g., competitive price prediction in online insurance aggregators, prediction of rare events (imbalanced datasets) such as insurance claims.
- Building and maintaining the overall software pipeline from data validation to model evaluation.

Jun. 2014 ~ Sep. 2014

## **European Space Agency - Internship**

- Worked in the Advanced Concepts Team on the project "Novelty Search for Soft Robotic Space Exploration".
- Applied novel evolutionary search methods (novelty search) for optimizing the morphology and gaits of soft-robots in varying gravity levels (video).

Jan. 2013 ~ Mar. 2014

#### **Dutch Nao Team** (Robotic-soccer team) - LEAD PROGRAMMER

- Developed existed C++ codebase for the Aldebaran NAO robot and the Standard Platform League, focusing on robot localization, team strategy and player behavior.
- Participated (placed in top-16 and 3rd) in international and open Robocup Standard Platform League competitions.

Oct. 2013 ~ Feb. 2014

## University of Amsterdam - TEACHING ASSISTANT

o Assisted in teaching the course C++ programming language.

Oct. 2013 ~ Feb. 2014

### VicarVision (Computer vision company), Internship

- Designed and developed an algorithm (in C# using OpenCV library) for estimating floor plane from monocular camera footage based on human detection samples.
- The resulted algorithm was able to determine the floor boundaries and the relative position of the floor plane in the three-dimensional space with regards to the camera placement.

## **Education**

PhD Artificial Intelligence - Delft University of Technology & CWI 1

Feb. 2015 ~ Aug. 2019

- Research on the application of AI methods in energy systems. Supervised by: Prof. Han La Poutré (CWI & TU Delft) and Dr. Michael Kaisers (Researcher, CWI).
- Main focus on the analysis of the behavior of self-interested agents within multi-agent systems using tools from game theory, and the design of pricing mechanisms in settings with uncertainty in supply and/or demand.
- Courses on deep learning (MSc course at the University of Amsterdam), European agent systems summer school, algorithmic game theory, non-cooperative games, stochastic optimization, entrepreneurship in mathematics and computer science, and several doctoral-level education workshops.
- PhD Thesis: Agent Interactions & Mechanisms in Markets with Uncertainties: Electricity Markets in Renewable Energy Systems

Sep. 2012 ~ Dec. 2014

#### MSc Artificial Intelligence - University of Amsterdam

- o Courses on machine learning (pattern recognition), neural networks, autonomous agents (reinforcement learning, multi-agent learning), natural language processing, computer vision, and information retrieval.
- Thesis project on the Evolution of Soft-Robots by Novelty Search, in collaboration with the Advanced Concepts Team in the European Space Agency (ESA), supervised by: Daniel Hennes (ESA), Dario Izzo (ESA) and Arnoud Visser (UvA), grade: **9**/10.

 $<sup>^1</sup>$ CWI (Centrum Wiskunde & Informatica) is the national research institute for mathematics and computer science in the Netherlands.

# Diploma in Electronic and Computer Engineering - Technical University of Crete

Sep. 2006 ∼ Aug. 2012

- Courses on software programming, algorithms and complexity, mathematics, probability theory, computer vision, signal processing, artificial intelligence, theory of computation, operating systems, and databases.
- o Thesis project on Player Behavior and Team Strategy for the RoboCup 3D Simulation League, supervised by: Prof. Michael G. Lagoudakis. I developed all the necessary software modules (in Java) for robot localization, biped locomotion, communication, team strategy, and coordination, grade: 10/10.

#### Research Publications ....

- 1. Georgios Methenitis, Michael Kaisers, and Han La Poutré. Forecast-Based Mechanisms for Demand Response. In: Proceedings of the 18th International Conference on Autonomous Agents and MultiAgent Systems, AAMAS '19, Montreal QC, Canada: IFAAMAS, 2019
- 2. Georgios Methenitis, Michael Kaisers, and Han La Poutré. Degrees of Rationality in Agent-Based Retail Markets. In: Computational Economics (2019)
- 3. Georgios Methenitis, Michael Kaisers, and Han La Poutré. Renewable Electricity Trading through SLAs. In: Energy Informatics 1.1 (2018)
- 4. Georgios Methenitis, Michael Kaisers, and Han La Poutré. SLA-Mechanisms for Electricity Trading Under **Volatile Supply and Varying Criticality of Demand**. In: *Proceedings of the 16th Conference on Autonomous* Agents and MultiAgent Systems. AAMAS '17. Sao Paulo, Brazil: IFAAMAS, 2017
- 5. Georgios Methenitis, Michael Kaisers, and Han La Poutré. Incentivizing Intelligent Customer Behavior in Smart-Grids: A Risk-Sharing Tariff & Optimal Strategies. In: Proceedings of the 25th International Joint Conference on Artificial Intelligence, IJCAI. AAAI Press. 2016
- 6. Georgios Methenitis, Michael Kaisers, and Han La Poutre. A Multi-Scale Energy Demand Model suggests sharing Market Risks with Intelligent Energy Cooperatives. In: Smart Grid Technologies - Asia (ISGT ASIA). IEEE. 2015
- 7. Georgios Methenitis, Daniel Hennes, Dario Izzo, and Arnoud Visser. Novelty Search for Soft Robotic **Space Exploration**. In: Proceedings of the 2015 Annual Conference on Genetic and Evolutionary Computation. GECCO '15. Madrid, Spain: ACM, 2015

## Technical Skills \_\_\_\_

#### Programming (Libraries)

### DEV. TOOLS / IDES / OS

#### **ROBOT PLATFORMS**

**Python** (PyTorch, XGBoost. NumPy, scikit-learn, seaborn), SQL, C/C++ (Boost, Debian), MS Windows, MacOS OpenCV, Qt, CMake), Java, C#, Matlab, HTML/CSS

TensorFlow, Git, Jupyter notebook, Bash / Experience with robotic simulators LightGBM, CatBoost, Vim, Spacemacs, LaTeX, PyCharm, and platforms, such as Webots, pandas, Qt Creator / GNU/Linux (Arch, Spark, Aldebaran NAO, Sony AIBO

# Interests \_

- o E-commerce and financial market machine learning applications
- o Design of pricing mechanisms (e.g., auctions) in settings with supply and/or demand uncertainty
- o Analysis of emergent market behavior via agent-based simulation
- Game theoretical analysis of pricing strategies in competitive markets
- Evolutionary algorithms (fitness-based novelty-based) for hyper-parameter or fitness optimization
